EDUCATION

- **K L University** — Vijayawada, India
  Bachelor of Technology - Computer Science And Engineering; CGPA: 9.36 — *September 2022 - 2026*
  Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Blockchain, Networking, Databases, Artificial Intelligence

SKILLS SUMMARY

- **Languages:** JAVA, C, JavaScript, Python, SQL, Bash
- **Frameworks:** SpringBoot, Microservices, Hibernate, RESTful, React, NodeJs, ExpressJs, Django
- **Tools:** GIT, NPM, MongoDB, PostgreSQL, MySQL, SQLite
- **Platforms:** Linux, Web, Windows, Arduino, AWS Cloud
- **Soft Skills:** Leadership, Team Management, Creativity and Innovation, Time Management

EXPERIENCE

- **Nayona Consultancy** — Remote
  Freelance Web Developer — *November 2024 - Present*
  - **Website Development**: Developing a website for Nayona Consultancy with features like blogs, career listings, contact forms, and chatbot integration.
  - **Oracle NetSuite Training**: Undergoing training on Oracle NetSuite and managing client permissions.
  - **Client Services**: Providing web solutions to businesses using Oracle EPM services.
  - **Compensation**: Earning 50,000 per month as a freelance developer.

PROJECTS

- **FusionHub: Project and Portfolio Management System**
  Tech: SpringBoot, ReactJS, Microservices — *November '24*
  - **Developed a comprehensive project and portfolio management system**: Integrated a ReactJS frontend with a SpringBoot microservices-based backend. The platform features user authentication, role-based access control, and project tracking and real-time collaboration.
  - **Implemented scalable architecture**: Built with Eureka for service discovery and API Gateway for centralized access, ensuring seamless communication between microservices.
  - **Enhanced user management**: Added an admin approval system for user registration, improving security and compliance.

  Website Link

- **MERN-Project-CLI: NPM Package**
  Tech: JavaScript, Git, NPM — *September '24*
  - **Created a CLI tool for streamlined MERN stack project generation**: Developed an intelligent CLI tool using Node.js that dynamically generates project scaffolding for MERN stack applications
  - **Achieved significant adoption**: Garnered over 2.2k downloads and maintained a 4.9-star rating on NPM & 20-stars on GitHub showcasing its reliability and developer satisfaction.
  - **Built a robust online presence**: Deployed a documentation website using Vercel, providing comprehensive guides and examples.

  Website Link   NPM Package Link

- **Samaa: Music Streaming App**
  Tech: MongoDB, Express.js, React.js, Node.js — *June '24*
  - **Built a full-stack music streaming app with RESTful API Architecture**: Implemented features like user authentication, song browsing, playlist creation, and song liking.
  - **Integrated Saavn API**: Fetched trending songs to enhance music discovery.
